

# RIVA TEAM RIVA FOR CIO-SP3 SB

CIO-SP3 SB has been designated by the OMB as Best in Class (BIC) making this GWAC a key acquisition tool. RIVA Solutions and our partners are proud to support government CIOs as a prime service provider on CIO-SP3 SB.

Agencies who utilize CIO-SP3 SB are able to make smart buying decisions that eliminate redundancies, increase efficiencies, drive innovation, and deliver more value and savings. With a \$20 billion ceiling, multiple contract types, and the ability to award in modular increments with performance-based features incorporated, CIO-SP3 SB offers streamlined ordering and procedures, saving agencies both time and money.

## Competitive Fees

# TOP TALENT

## OUR PEOPLE ARE OUR #1 ASSET

RIVA invests heavily in our people because our people are our greatest asset. Our employee-first approach to management has manifested into a culture that attracts the best and brightest. By investing in people first, our project teams have higher morale, higher productivity rates, and lower turnover. Happy resources translate into more innovative solutions and ultimately happier customers.

Our community of over 2,500 health and health IT professionals are leading experts in Cloud, DevSecOps, AI/ML, RPA, Cyber, Project Management, and all facets of modernizing and deploying IT systems and solutions. Our extensive bench of part-time and full-time Federal health and health IT professionals allows each project team to scale with the right certifications and level of support for any size task order.

# DELIVERY EXCELLENCE

## YOUR MISSION IS OUR MISSION

Experience a seamless transition from contract award to delivery driven by our experienced PMI and Agile, SAFe certified portfolio managers. Our dedicated portfolio management team is supported by a robust technology stack and RIVA's project + portfolio management dashboard, Project HealthCheck.

Project HealthCheck provides a multi-level dashboard view from project to portfolio which enables data-driven decision-making related to transition activities, key project milestones, financials, and innovation goals. More than just a dashboard, Project HealthCheck gives teams the ability to build technology roadmaps to support enterprise-wide solutions modernization and business process automation initiatives, track emerging trends, monitor costs, and increase efficiency. Customer satisfaction is our number one priority and we have the CPARs to prove it! Achieve consistent project success with Project HealthCheck.

# INNOVATION SOLUTIONS CENTER

## POWERING SOLUTIONS FOR BETTER GOVERNMENT

The ISC is a cross-functional team that bridges the gap between RIVA's technical leadership, solutions teams, and those in the field. It brings together deep skills and expertise across our eight core capability areas to find innovative solutions for client needs. The ISC is a think tank space where staff can flex their creative muscles, create prototypes, drive product development, and receive highly sought-after training and certificates.

ISC members support multiple client projects and corporate initiatives including the full lifecycle of business development activities from thought leadership, technical capture, proposals, client delivery, and solution and product development. Our approach allows members to cross-pollinate skills, ideas, and facilitate peer learning opportunities which leads to faster, more agile deployment of innovative new solutions and best practices that immediately add value to our clients. The ISC helps clients save money, reduces implementation risk, and fosters a culture of continuous learning and innovative thinking.
