## WHY TEAM RIVA?

Mature Prime

CMMI Level 3 DEV

20+ Agencies Supported

## GWAC SUB-AREA

## EMERGING TECHNOLOGIES

## OUR CAPABILITIES

### DEVSECOPS

- Deliver applications at the pace of business with comprehensive DevSecOps services
- Agile transformation to deliver business value
- Intelligent, automated testing services to accelerate the transition to fully automated DevSecOps

### CYBERSECURITY

- Resilient cyber defense to strengthen mission operations
- Leverage AI to provide defense to sniff out anomalies of malicious behavior
- Zero trust architecture solutions that rapidly scale with automated ATO

### DATA SCIENCE

- End-to-end orchestration and automation of data pipelines from data ingestion to visualization
- Immediate data access to data scientists, business analysts, and operational staff upon ingestion
- Apply DataOps and MLOps best practices to automate a pipeline using our InsightOps approach

### CLOUD

- AI-based multi-cloud deployments that provide built-in security, standardized deployments, and predict how operations will perform
- A single, transparent view into your software delivery processes to ensure optimal performance of deployment pipelines
- Faster innovation with intelligent deployments
- Leverage IaaS, PaaS, SaaS services from multiple cloud vendors to provide vertical and horizontal scaling solutions that work at scale

# INNOVATION

## POWERING SOLUTIONS FOR BETTER GOVERNMENT

RIVA's Innovation Solutions Center (ISC) is a cross-functional team with subject matter experts from all RIVA's capability areas. The ISC is a think tank space where staff can flex their creative muscles, create prototypes, and develop innovative new products and solutions which help clients save money, reduce implementation risk, and quickly adapt to changes within the Federal IT landscape.

## DELIVERY EXCELLENCE

### YOUR MISSION IS OUR MISSION

Experience a seamless transition from contract award to delivery driven by our experienced PMI and Agile, SAFe certified portfolio managers. Our dedicated portfolio management team is supported by a robust technology stack and RIVA's project + portfolio management dashboard, Project HealthCheck. Customer satisfaction is our number one priority and we have the CPARs to prove it!

## TOP INDUSTRY TALENT

### PEOPLE ARE OUR #1 ASSET

Our community of over 2,500 IT professionals are leading experts in Cloud, DevSecOps, Data Science, RPA, Cyber, Project Management, and all facets of modernizing and deploying IT systems and solutions. Our extensive bench of part-time and full-time IT professionals allows each project team to scale with the right certifications and level of support for any size task order.

# PUBLIC SECTOR

# DIGITAL TRANSFORMATION & MODERNIZATION

Team RIVA is the industry leader in digital transformation and modernization efforts for the public sector. We specialize in FedRamp certified COTS and open source solutions, to provide the ultimate flexibility and support in any IT environment. Check out the **RIVA impact** on some of our past and current digital transformation projects:

## DEPARTMENT OF AGRICULTURE ENTERPRISE DIGITAL TRANSFORMATION

USDA is undertaking a department-wide digital transformation initiative to consolidate and modernize its websites and web content management capabilities. RIVA is leading USDA's digital transformation efforts, including migration of agency websites to an enterprise Azure Drupal 8 and adoption of Agile and DevSecOps best practices.

## HEALTH AND HUMAN SERVICES MODERNIZING FINANCIAL SYSTEMS

RIVA is shaping the future of modern, cloud-based financial and billing systems at the Program Support Center (PSC). RIVA is leading efforts to establish a five-year roadmap encompassing upcoming milestones for digital transformation, hosting, cloud strategy, and the adoption of DevSecOps as the department moves toward modernization and consolidation of legacy financial systems.

## DEPARTMENT OF COMMERCE DATA SCIENCE FOR OUR OCEANS

RIVA provides NOAA's CoastWatch/OceanWatch program with verticle Agile data science teams to support the creation of coastal/ocean satellite imagery products, ensuring access to near real-time satellite data, and enabling NOAA's mission of coast and ocean stewardship.
